December 21, 2010

Sir:

This paper is filed further to the response filed December 1, 2010 and to the Interview Summary dated December 13, 2010.

The substance of the interview of November 22, 2010 is incorporated into the Remarks to the Amendment filed on December 1, 2010. It is noted that the Examiner's comment in the Interview Summary is correct as a typical illustration except that the intersecting patterns on successive cylinders are "an" inventive feature. Also, claim 1 recites "at least two cutting patterns" and "synchronized cutting cylinders."
